

Redesign Website for Age in Spain

Please refer to our Website: <http://ageinspain.org>

Age in Spain is the first national charity in Spain dedicated to the welfare of English-speaking older people. Our mission is to provide help, information, and assistance to enable English speakers in Spain to live their best lives. We have been serving this community for over thirty years, including those in the Canary Islands and the Balearic Islands.

We are currently seeking a skilled designer/developer to elevate the user experience for our forthcoming web redesign. The ideal candidate will possess a robust portfolio that demonstrates their expertise and a comprehensive understanding of user-centered design principles. The selected individual will be responsible for the creation of mockups, ensuring that our product is both aesthetically pleasing and user-friendly.

Collaboration with stakeholders will be essential in bringing your designs to fruition. If you are passionate about building engaging websites that address real-world challenges, we would be delighted to receive your application.

Experience Requirements

- 3+ years of proven web development/design experience
- A demonstrated portfolio of solid work, preferably with some experience working with nonprofits and/or charities
- English language preferred for working, a knowledge of Spanish is nice to have
- Ability to work Central European hours as needed for meetings
- Current site is using Wix, though open to other platforms.

Deliverables

- A comprehensive plan that reorganizes existing content
- A simplified and standardized navigation.
- Design elements and guidelines to ensure consistency across all pages
- Production of website to launch
- Transition of website management to internal team

Duration: 1-3 months (less than 30 hours per week)

Fee: negotiable, pro bono offers very much appreciated.
